Three Immunity drips within 60 days.

\$549**The HMI Standard Bundle**

Labs + provider review + first month single-pill protocol + one drip.

\$449

— PRECISION SUPPLEMENTATION · THE HMI STANDARD

One pill. Built from **your bloodwork.**

Off-the-shelf supplements are built for the average person — and average is exactly what we're here to beat — and unlike the store shelf, our formulations are pharmaceutical-grade. We run comprehensive labs, read your numbers against the HMI Standard — optimal ranges, not population averages — and formulate a single daily pill that covers precisely what your biology needs. Then follow-up labs prove what moved. Nothing more, nothing missing.

Don't accept normal.

1

Comprehensive labs

A panel far deeper than a standard physical — hormones, vitamins, minerals, metabolic markers.

2

Read against the HMI Standard

Calibrated to optimal ranges — where energy, sleep, and clarity live — not population averages.

3

Your single-pill formulation

Your numbers become one precise daily pill. No cabinets full of bottles. No guessing.

4

Retest & refine

Follow-up labs confirm what's working. Your formulation evolves as your body does.
